

Inductors for power circuits **Wound metal SPM** series

# SPM6530 type

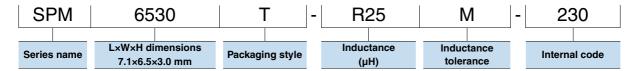

## **FEATURES**

- O Magnetic shield type wound inductor for power circuits using a metallic magnetic material.
- Ocompared to ferrite wound type inductors, it is possible to achieve large current, low Rdc, and compactness.
- O Low inductance variance in high-temperature environments with good DC superimposition characteristics.
- OMetallic magnetic material is used, and the structure has an integrated molded coil, so hum noise is lower than with core adhesive coils.

### APPLICATION

O Note PCs, HDDs, servers, VRMs, compact power supply modules, other
